

**TUNEin™ to READING** is the fastest, most effective research based literacy software on the market today. The program advances reading in the areas of fluency, vocabulary and comprehension through the use of a fun, interactive singing software. On average, struggling readers gain 1+ grade level improvements in reading in just 9 weeks!

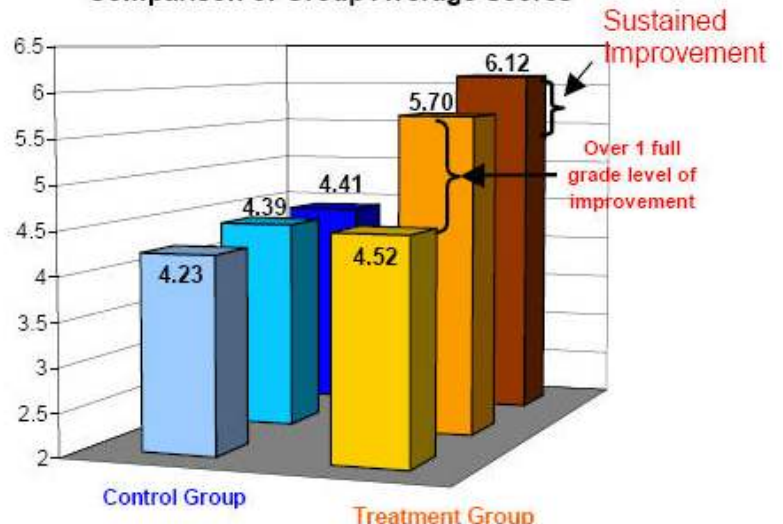

Music is the catalyst behind this breakthrough success: students sing with all of their heart and soul, striving to achieve a high score, and in the process improve their reading. Unlike “skill and drill” exercises, TUNEin™ to READING breathes life and joy into learning, leveraging lasting gains in vocabulary, fluency and comprehension. The software is scientifically based and research proven with literacy experts agreeing: it’s extraordinary!

TUNEin™ to READING provides a fun and engaging environment of repeated reading through the use of song lyrics, which is an alternative text format for reading. The reputation of orally reading has been found to be an effective means of increasing fluency – and students who are able to read smoothly, effortlessly and with proper expression are more likely to understand and comprehend what they just read. TUNEin™ to READING is the catalyst that helps students drastically improve their reading comprehension through music and singing to gain reading success.

For students that have struggled and failed to make gains through traditional reading intervention methods, TUNEin™ to READING offers both students and teachers a new, effective way to help struggling readers achieve success. With minimal required start-up time and instruction, TUNEin™ to READING is easy for teachers to use and students find it fun in a game-like environment. Students use TUNEin™ to READING for 30 minutes, three times per week, for a 9 week period. Sitting at a computer, students wear a headset with an attached microphone and sing to the on-screen lyrics of songs that have been selected to their current reading level.

TUNEin™ to READING is a unique reading intervention program that effectively motivates and engages struggling readers in a way that makes them wanting to come back for more, thus creating a repeated process of fun learning. TUNEin™ to READING has helped over 10,000 struggling readers across the United States achieve reading success.

Comparison of Group Average Scores

***"In a nine-week period, test scores increased two to three grade levels."***
